 - Fire Extinguisher rated @10BC
 - Three Triangles
 - NAVSEA SWO20-af-abk-010

Authorization for Off-Base Transport

- The following slide(s) are examples of the letter format to transport ammunition off-base for Quantico

UNITED STATES MARINE CORPS
MARINE BARRACKS
8TH & I STREETS S.E.
WASHINGTON, D. C. 20390-5000

✓
IN REPLY REFER TO:
8000
S4
13 Jul 2009

From: Arms, Ammunition, and Explosives Officer,
To: Commander, Marine Corps Base, Quantico VA
(Attn: G4/ASP)

Subj: REQUEST FOR AUTHORIZATION TO TRANSPORT AMMUNITION FROM
THE QUANTICO ASP TO MARINE BARRACKS WASHINGTON.

Ref: (a) MCO P8020.10B

Encl: (1) Requested authorized DODIC list

1. Per the reference Marine Barracks Washington requests authorization to transport ammunition from the Quantico ASP to back to Marine Barracks Washington in an approved government vehicle certified for transportation of ammunition. The dates the ammunition will be transported are (090721-090723).

2. Enclosure (1) contains the DODIC's requested for authorization to transport off base.

3. Marine Barracks Washington will pickup the ammunition at the Quantico ASP and will proceed directly back to Marine Barracks Washington, keeping positive control, security and accountability at all times until turned over to authorized personnel. The ammunition will be stored in accordance to the NAVSEA OP 5 vol 1. Upon completion of the training event, the ammunition will be returned to a DDESB site approved DOD magazine area or to the Quantico ASP.

4. Prior authorization and coordination with local law enforcement agencies will be conducted.

5. Point of contact at this command is MSgt Whiteside or Sgt Wright at 202-433-3979.

A. A. Steele
A. A. STEELE

REQUETED DODIC LIST FOR OFF-BASE TRANSPORTATION

| DODIC | QTY | Hazard class | Total N.E.W. |
|-------|------|--------------|--------------|
| A059 | 7500 | 1.4S | 28.5 |
| A064 | 5000 | 1.4S | 42.5 |
| A363 | 1000 | 1.4S | .9 |
| B550 | 130 | 1.3C | 15.47 |

TOTAL N.E.W 87.37

PLACARDS

- Each Vehicle must have proper placards on it
 - Placards are required for front, rear, & both sides of vehicle
 - Front placard must be displayed on Grill, NOT the hood.
- “The placards are very important in regards to the transportation of ammo. There are different hazard classes and compatibility groups for ammo. The most serious hazard class of the ammo on the vehicle determines what type of placard is required. For example if the truck was carrying AA33, (5.56mm ball) and G881, (fragmentation grenades), the proper placards would be 1.1. The hazard class for AA33 is 1.4 and the hazard class for the G881 is 1.1. 1.1 is the highest hazard class followed by 1.2, 1.3 and finally 1.4. Also the storage compatibility comes into play as well as to what ammo can be transported in the same compartment. There are several compatibility classes. S can ride with all other classes. C, D and E can also ride together. So for example if you were transporting S, G, C, and F you would need three compartments. S can ride with any of the others so for the sake of this example we will put S and G in the same compartment. C and F would each need their own compartments. If the unit has any questions they can call the ASP to about how many compartments they will need. The compatibility letters are supplied with the placards when ordered. However they are not required to be applied to the placards for ammo transportation. Placards can be ordered from <http://www.labelmaster.com>. It is important to note that the 1.4 placard differs from the 1.1, 1.2 and 1.3 placards. 1.4 cannot have the picture of the bursting bomb on the placard. The 1.1, 1.2 and 1.3 placards must have the bursting bomb on it. It is important to note that you cannot simply place a piece of tape and write the correct hazard class on the placard.” ~Quantico ASP

Field Return

- Returning from the field yields requirements
 - Weight
 - Hazard class
 - Placards
 - Compatibility
 - All must be adhered to when bringing ammo back to the ASP
 - ▮ A Disrep report will be issued for each discrepancy

CAT 1

- CAT 1 items must
 - Be escorted by an E6-O10
 - ▮ Must sign DD Form 1907 (chain of Custody)
 - When transporting items under DD Form 1907, Explosive vehicle is NOT authorized to stop or pull over for ANY reason
 - Must have two armed escorts
 - ▮ Follow vehicle must have armed escort

Review

- **Ammo Techs**

- Insure you have all your paperwork/gear
- Driver's are qualified
- Placards
- E581 from TAMIS
- DOA
- Glove Box's for each Vehicle
- Security weapon with ammo
 - ▮ Escort each vehicle with ammo in it
 - CAT 1 must have two Armed escorts (one can be follow vehicle with armed escort in it)
